No professional experience

EDUCATION

B.S. in Information Technology

UADE

03/2023 - 12/2026 C.A.B.A, Buenos Aires

- Data Structures & Algorithms
- Objects & Design
- Project Organization & Programming
- Object-Oriented Programming
- Statistics & Applications

PROJECTS

Python Flight Scraper

10/2025

Requests, camoufox, python-telegram-bot, Linux Env.

- Developed Python script to scrape flight offers from LATAM Airlines, using Camoufox to extract real browser headers for the API's request, and sending the results via Telegram in a human-readable format
- Results: effectively automated a manual task with daily updates via cronjobs in my Linux environment

Uber Shipping Rates

09/2025

curl_cffi, Google Maps API, Linux Env.

- Developed Python script for active e-commerce to get both car and motorcycle shipping rates based on location provided by the Google Maps API, using curl_cffi to make the request to the corresponding API
- Results: new feature added to the e-commerce's website, resulting in +23% active buyers in C.A.B.A

CERTIFICATIONS

C1 Advanced

Cambridge University

TRAINING / COURSES

Introduction to Linux

Hack4u

The Git & GitHub Bootcamp

Udemy

SKILLS

Technical

Python (Web Scraping, API requests, OS library)

Linux Systems

Bash Scripting

SQL

Network Protocols (TCP/UDP/HTTP)

Vulnerability Assessment

SSH

Tools

GitHub

Postman

Linux as main OS for programming

Wireshark

Burp Suite

Network Scanning tools

Offensive Security Tooling

ProtonVPN/Tailscale/OpenVPN

Soft

Detail-oriented

Strong communication skills

Methodical approach

Proactive response to problems

Effectively integrate feedback
